Samsung & Android Wallpaper Setup Guide

For The Gentle Reminder Pack 🌿

Welcome

Thank you for downloading the Gentle Reminder Pack.

These wallpapers were created as gentle pauses throughout the day — small reminders to slow down, breathe softly, and reconnect with what matters.

This guide will help you set up your Samsung or Android device wallpapers.

Before You Begin

1. Download and unzip the wallpaper pack

After downloading:

- Open the ZIP file
- Save the wallpapers into your Gallery or Photos app

You may create an album called:

`gentle reminders`

to keep the wallpapers organized.

Setting a Lock Screen Wallpaper

Step 1

Open the wallpaper image from your Gallery.

Step 2

Tap:

`More`

or the:

⋮

menu icon.

Step 3

Select:

`Set as wallpaper`

Step 4

Choose:

`Lock screen`

or:

`Lock screen and Home screen`

depending on your preference.

Creating a Wallpaper Rotation Experience

Some Samsung and Android devices support wallpaper rotation through:

- Dynamic Lock Screen
- Wallpaper Services
- Third-party wallpaper rotation apps

You may also manually change wallpapers throughout the week for a slower and more intentional experience.

Recommended EES Experience

Instead of frequent automatic changes, consider:

changing the wallpaper once each morning

This creates a quieter rhythm and allows each reminder to stay with you throughout the day.

Optional Samsung Dynamic Lock Screen

On supported Samsung devices:

Go to:

`Settings`

→ `Wallpaper and style`

→ `Change wallpapers`

→ `Wallpaper services`

Some Samsung models may allow rotating wallpapers automatically.

Final Step

Once your wallpaper is set:

pause for a moment,
take a softer breath,
and allow the reminder to stay gently with you throughout the day 🌿

A Gentle Reminder

These wallpapers were created as quiet companions —
small pauses to soften the noise, slow the pace, and reconnect with yourself gently.
